Driven and self-motivated, I constantly seek opportunities to learn and innovate. Passionate about leveraging technical expertise to create impactful solutions, I thrive on solving challenges and enhancing customer experiences. My goal is to contribute innovative ideas and cutting-edge technologies to drive business success while continuously expanding my skill set in the evolving tech landscape.

## PROJECTS

### Task Management System [\(Link\)](#)

- Built a responsive To-Do web application using React.js with features to add, edit, and delete tasks.
- Implemented search and filter functionality to sort tasks by priority, completion status, and creation date.
- Enhanced usability with priority tagging and a clean, user-friendly interface for efficient task management.

### Movibly - Movie App [\(Link\)](#)

- Built a responsive movie discovery platform using React.js and styled with Tailwind CSS for a modern UI.
- Implemented search, genre-based filtering, pagination, and detailed movie views using real-time API data.
- Added a favorites feature for bookmarking movies, enhancing interactivity and user experience across devices.

### Project Management System

- Developed and designed a Project Management web application with React.js, Node.js, and MySQL.
- Enabled admin to create projects, control team members, and schedule tasks within every project.
- Implemented user-specific task assignment, real-time status updates, and role-based access.
